Fullstack software developer

Roman Puchinsky

Full-Stack Developer | Building on Embedded Systems Foundation
Israel

Summary

Real-time embedded systems engineer with a proven track record of developing robust and efficient software. Currently transitioning to full-stack development, bringing a strong understanding of software architecture, data structures, and algorithms. My experience in resource-constrained environments has instilled a focus on performance and optimization, valuable assets in full-stack development. Eager to contribute my skills to a challenging and rewarding full-stack role. Learning [mention technologies] and actively seeking opportunities.

Experience

Magshimim Cyber Programme

Instructor

2021 - 2024 (3 years)

Israel

Delivered engaging C++ programming instruction to students, covering object-oriented programming, data structures, algorithms, etc. Provided guidance and support to students throughout the development of their final programming projects as they team leader, fostering problem-solving skills and practical application of C++ concepts, planning and Meeting targets

Elbit Systems Ltd

Software Engineer

April 2016 - February 2019 (2 years 11 months)

Haifa Area, Israel

- support and development of operation and monitoring, and UI mechanisms. Witch allows pilots to operate the avionics computer that responsible for delivering augmented reality and symbology display to the pilot.
- support and development on Atmega 2561 microcontroller, which interfaces with FPGA that converts video input from analog to digital. Also, the microcontroller responsible for routing serial communication from the avionic

computer, debug tool, and testing equipment using UART RS - 485 protocol to the internal and external devices using I2C and SPI.

- Integration with a night vision system. Were responsible for developing the operation and monitoring, and UI mechanisms using UDP protocol.

- Software development from design to implementation as part of a "demo team". The team was responsible for implementing new solutions and integrating with new hardware and software technologies on existing products.

Education

Coding Academy Israel

certificate, full-stack developer · (2024 - 2025)

Experis Software

certificate, Computer Software Engineering · (2015 - 2015)

University of Haifa

Bachelor's degree, Business/Managerial Economics · (2011 - 2013)
